

PRIMUS SHARED WEB HOSTING

Create your global presence on the web for a minimal cost.

Web hosting creates your global presence on the Internet, providing an easy way for prospective and existing clients to reach you. With a hosted Web site, your company is open for business 24 hours a day, seven days a week. Primus Shared Hosting allows you to build a Web site (or have one built to your specifications), complete with a worldwide domain name, on a server shared with other Primus customers. Whatever size your business is, Primus has multiple shared hosting solutions to meet your complete needs.

Full-Featured Hosting Packages

With Primus Shared Hosting, you can choose one of two platforms: industry-standard UNIX, providing highest security and reliability or Windows NT, with a strong development environment. Either way, you get to take advantage of the Primus Global Application-Intelligent Network™, multiple connections to the Internet and a technical support team on call 24 hours a day.

Because Shared Hosting sites live on a server with other sites, Primus is able to keep your costs low. Shared Hosting offers a wide variety of hosting services – including developer's tools and e-commerce tools – for a reasonable cost.

Standard Shared Hosting features include:

- ◆ Set-up service and support
- ◆ Access to secure site management console for site maintenance
- ◆ 24-hour FTP Access
- ◆ E-mail boxes
- ◆ Free "Setup Wizard" and support for FrontPage 2000 Extensions
- ◆ Choice of Web templates
- ◆ Site performance and site traffic reporting via Web Trends
- ◆ Individual CGI-bin directory support
- ◆ Development tools
- ◆ Network reliability, including daily system back-ups, uninterruptible power and extensive security procedures for your complete online protection

Shared Hosting Packages

There are several Primus Shared Hosting plans, each offering different billing structures and software bundles to meet your needs. With Primus, you can start with a plan for a simple Web site with e-mail boxes and grow – as your needs do – to a fully transactional e-commerce site.

Additionally, Primus offers a variety of value-added services for your site, including:

- ◆ Custom Web site creation
- ◆ Site enhancement
- ◆ Business logo design
- ◆ Online catalogue and store creation
- ◆ Search engine registration

Why Primus Is More Than Just Talk

Primus has built the next-generation application infrastructure to support business-critical Internet and e-commerce applications.

Primus' end-to-end service-delivery capabilities are centered on the Primus Global Application-Intelligent Network (GAIN).

The Primus AIN combines the Primus Global ATM + IP network, application centers, application accelerators, application management capabilities and application services into a cohesive, globally enhanced application delivery platform.

Primus is:

- ◆ Integrated total service provider with \$1.2B in revenue and over two million customers
- ◆ Facilities-based provider with assets on four continents
- ◆ Global carrier with ownership interests in more than 25 fiber-optic cable systems

For more information on a Primus solution that fits your needs, please contact your Primus sales representative or see Primus' corporate Web site.
